

Assignment No:

File & Directory Management using Bash Commands

Name: Angkon Mitra

Objective:

The objective of this assignment is to learn how to create directories, create text files, write content into files, and display file contents using Bash commands in the Linux terminal.

Tasks Performed:

Create a Directory

A new directory named [Week2Tasks](#) was created in the home directory.

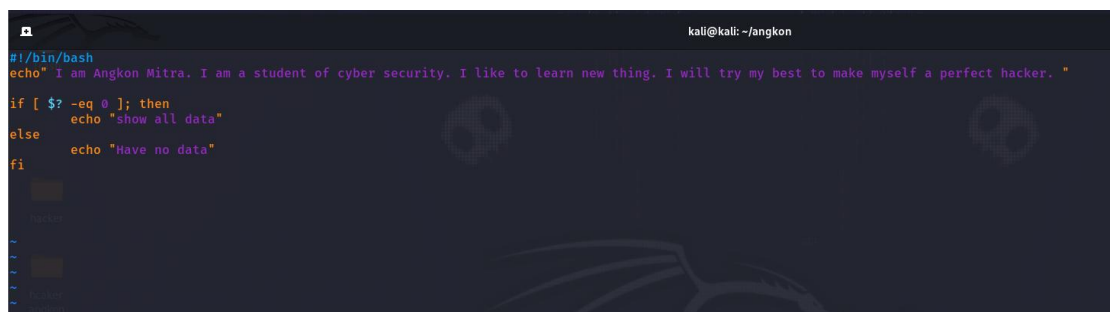

Command Used: [mkdir week2tasks](#)

Create a Text File

A text file named [angkon.sh](#) was created inside the Week2Tasks directory.

Command Used: [vim angkon.sh](#)

Bash Script ([angkon.sh](#))

A screenshot of a terminal window with a dark background. The window title is 'kali@kali: ~/angkon'. The terminal shows the following text:

```
#!/bin/bash
echo " I am Angkon Mitra. I am a student of cyber security. I like to learn new thing. I will try my best to make myself a perfect hacker. "
if [ $? -eq 0 ]; then
    echo "show all data"
else
    echo "Have no data"
fi
```

$ vim angkon.sh
(kali@kali)-[~/angkon]
```

Figure:2.3

Conclusion:

In this assignment, basic file and directory management operations were successfully performed using Bash commands. This helped in understanding how to work efficiently in the Linux terminal environment.
