

Assignment on: Folder & File system, Network Interface Information and Privilege

Name: Angkon Mitra

The main objective of this **Assignment** is to learn how :-

- Create a Directory in Linux .
- Store Network Interface Information into a file .
- Make change file permissions.
- View File permissions.

My Task:

Create a Folder in the Documents Directory named **Task_One** and then Write there the output of your Network Interface Information in a text file named **EHP.txt** . Change the privilege of the File **EHP.txt** thus the owner and group have full permissions, and others can only read and execute it.

Solutions:-

```
(kali㉿kali)-[~]
└─$ pwd
/home/kali

(kali㉿kali)-[~]
└─$ ls
192.168.226.133  Firefox_wallpaper.png  hay.txt          new2file.txt     Public
angku           FootprintProject        hi               newfile.txt      subdomains1.txt
Byte            fork.1                  hi.txt           ok.txt           subdomains.txt
CamPhish        fork3                   iso27001_scanner output.txt        Templates
Capsuleit       fork3.c                iso_gap_tool     Pictures          urls.txt
data            fork4                   iso-scanner      ppp              Videos
Desktop          fork4.c                iso_scanner      program          program.c
Documents        fork5.c.save            main.cpp.save    program.c         program.c.save
Downloads        go                      Music

(kali㉿kali)-[~]
